ABOUT THE WORKSHOPS

One-Day Workshop
Sensory Integration ~ How Does It Work?
by Jeanette Suen, OT(C), SROT

20 November 2008
Venue: Kompleks Haji, Kota Kinabalu
Time: 8am to 4:30pm

Sensory Integration plays a fundamental role in a child's development, learning and behaviour. For children with special needs, such as those with cerebral palsy, developmental delay, autism, attention deficit, hyperactivity, learning difficulty, etc., though their sensory systems may be intact, their processing / integration of sensory information may be affected. This 1-day workshop is designed for parents of young children with special needs. The concepts of Sensory Integration will be introduced and simple strategies that parents can use to enhance sensory integration to support development, learning and behaviour will be discussed.

Objectives Participants will be able to:

1. Relate sensory integration to development, learning and behaviour;
2. Identify individuals with issues in sensory integration; and
3. Apply simple strategies that enhance sensory integration

Two-Day Workshop

PECS BASIC TRAINING
By Amanda Reed, PECS Australia

19 & 20 November 2008
Venue: Kompleks Haji, Kota Kinabalu
Time: 8:30am to 4:30pm

This workshop is appropriate for all members of the educational team who would like to learn about the Picture Exchange Communication System, including speech-language pathologists, parents, teachers, paraprofessionals, behaviour analysts, psychologists, social workers and/or other professionals who are providing services to/for individuals with developmental disabilities

This intense two-day training is designed to teach participants the theory behind The Picture Exchange Communication System and the protocols on how to appropriately implement the six phases of PECS.

The Picture Exchange Communication System (PECS) is used to teach communication skills rapidly to those with limited functional speech. PECS promotes communication within a social context, without lengthy prerequisite training. Training in PECS begins by teaching a spontaneous request and goes on to teach additional communicative functions such as responding to questions and commenting. An added attraction for preschool children with autism and related disabilities is the high proportion of children who acquire independent speech. Participants will learn how to implement the six phases of PECS, plus attributes, through presenter demonstrations, video examples and role-play opportunities. Participants will leave the workshop with an understanding of how to implement PECS with individuals with autism, related developmental disabilities, and/or limited communication skills.

What You Will Learn:

- The key Pyramid components to designing effective educational environments
- Strategies to create an abundance of opportunities for communication
- The relationship between PECS and traditional communication training approaches
- How to implement all six phases of PECS with target individuals using a behaviour analytic orientation
- The criteria for transitioning from PECS to other communication modalities
